

- For your Photographer's Eye Presentation with your partner, you will need to have a primary image and 2 backup images for each of the 6 categories.
- On the day that your proposal is due, your group will be notified about which images you can use for your presentation.
- No duplicates will be allowed between the different groups.

For your proposal, you need to have a total of 12 images prepared and ready to submit for review.

- The Photographer must be successful enough to have been published in non-school publications or has shown in non-school galleries.
- If using images from a website, they **must be at least 800 pixels** on the long side. You can check this on Google images or by downloading the image and opening it up in Photoshop. If in doubt, ask the instructor for approval. There is a video tutorial on this.
- Submit 2 images for each category. Include the photographer's name, and title of the artwork (if there is a title).
- Create a folder with your names. Submit to the Dropbox with the images listed with your proposal. Example: Truitt_Gomez (Should contain 12 images)

The Thing Itself
