

E8: Window Matting Exercise

Take a mounted print of an original photograph. Minimum size is 10" on long side.

Then cut a window mat in mat-board as shown in class.

Pay attention to:

- 1/8 overlap of mounted image
- Corners – don't have "over cuts"

Show in class for credit. This is a completion grade. This is practice before the final project. I will help you see the areas that can be improved now, so that you get it looking great for the final project.
